

NCIA PRE-EMPLOYMENT TRAINING (PET) PROGRAMME

The Northern Corridor Economic Region (“NCER”) development programme is a Government initiative to accelerate economic growth and elevate income levels in the north of Peninsular Malaysia, encompassing the states of Perlis, Kedah, Pulau Pinang and Perak (districts of Hulu Perak, Kerian, Kuala Kangsar and Larut Matang-Selama). The NCER initiative will span from 2008 until the end of the 12th Malaysian Plan period, i.e. 2025.

Established in 2008, the Northern Corridor Implementation Authority (“NCIA”) is the body responsible for providing direction and for implementing policies and strategies in relation to socio-economic development in the region, with focus on the agricultural, manufacturing and tourism sectors.

One such development programme is the NCIA Pre-employment Training (“PET”) Programme that provides eligible graduates and school leavers with skills training in several disciplines. The main objective of the NCIA PET Programme is to equip eligible candidates with up-to-date skills to ensure successful employment.

The NCIA PET Programme is intended specifically for the population of the NCER. It is a fully sponsored training programme with provision of monthly allowance throughout the training period.
